

Kamran Maqbool

Python Developer

Lahore, Pakistan | Phone: +92 3436744420 | Email: kamranmaqbool37@gmail.com

[LinkedIn](#) | [GitHub](#)

Professional Summary

Detail-oriented and results-driven Python developer with over 5 years of experience in web development, primarily focused on backend development using Django and Django Rest Framework. Proven expertise in building scalable, maintainable APIs and services, integrating third-party tools, and working in agile environments. *Passionate about integrating AI/ML solutions into backend systems, with hands-on experience in deploying machine learning models and working with data processing libraries like Pandas and NumPy*

Technical Skills

- **Languages:** Python, JavaScript, PHP
- **Frameworks:** Django, Django Rest Framework, Flask, FastAPI, Laravel, React.js, Vue.js, AngularJS
- **AI/ML Tools:** TensorFlow (basic), Scikit-learn (basic), Pandas, NumPy, Langchain
- **DevOps & Tools:** Docker, Git, GitHub Actions (CI/CD), Redis, Celery, RabbitMQ
- **APIs:** RESTful APIs, third-party API integration (Slack, Jira, MindsDB, LinkedIn)
- **Databases:** PostgreSQL, MySQL, SQLite, MongoDB
- **Cloud & Storage:** Amazon S3, DigitalOcean Spaces, AWS/Azure
- **Testing:** PyTest, Unit Testing
- **Others:** CRON jobs, Background tasks, Agile/Scrum development

Professional Experience

Python Developer | Transdata, Lahore, Pakistan

October 2022 – Present

- Developed and maintained scalable back-end systems using Django and Django Rest Framework.
- Collaborated with AI teams to integrate machine learning models into Django-based applications.

- Integrated AI/ML components and handled background task processing using Celery and RabbitMQ.
- Implemented cron jobs for keyword crawling and automation.

Full Stack Developer | Linked Matrix, Lahore, Pakistan

September 2020 – September 2022.

- Focused on backend using Django and Django Rest Framework.
- Developed background workers and integrated external APIs.
- Participated in design discussions and deployment automation.
- Explored AI concepts for keyword searching tools, including basic data analysis and trend prediction.

Full Stack Developer | Geekinn, Lahore, Pakistan

August 2018 – August 2020

- Developed web applications including HRMS, Autosshine, and an Upwork-style freelancing platform.
- Worked with Laravel, AngularJS, React.js, and Vue.js.
- Contributed to frontend and backend development using agile methods.

Projects

Title Assistant AI

- Supports real estate transactions in the U.S.
- Developed secure APIs for title and settlement processing.
- Technologies: Python, Django, Django Rest Framework

Federation AI

- Integrated with Slack and Jira to fetch data, leveraging MindsDB for predictive analytics and report generation.
- Manages OAuth integrations and report generation logic.
- Technologies: Python, Django, Django Rest Framework, AI/ML

WERP (Keyword Search Tool)

- Fetches trending data from Twitter, Google, YouTube, and Reddit.
- Built REST APIs, cron jobs, and test coverage using PyTest.
- Technologies: Python, Django, Django Rest Framework

Certification:

Ongoing learning:

- DeepLearning.AI—AI for Everyone (Coursera)
- [100 Days of machine learning](#) (continue)

Education

Bachelor of Science in Computer Science | University of Sargodha (Lahore campus) | 2013-2017

Languages

- English (Intermediate)
